AGPOST™

Tough as the land down under.

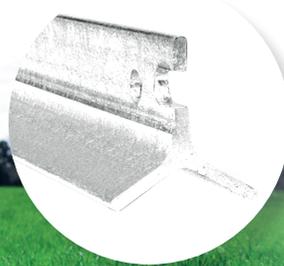

**TOUGH AS
THE LAND
DOWN UNDER.**

AGPOST™

TRUE AUSSIE GRIT.

▶ *Made to the toughest Australian standards. Ag-Posts are manufactured from high grade rolled steel and are break, bend and twist resistant. Every post is made with precision hole placement for consistent alignment. Long lasting, high quality and great value, Ag-Post is as tough as they come.*

▶ *Manufactured from high grade rolled steel and are break, bend and twist resistant.*

▶ *Every post is made with precision hole placement for consistent alignment.*

▶ *Hot dipped galvanized or traditional black bituminous coated.*

▶ *Uniformly cut end-points to ensure straight and easy drive in.*

HOT ROLLED FROM NEW BILLET STEEL !

AGPOST™

HOT ROLLED BILLET

Billet Steel is used in Ag-Post Steel Fence Posts. This ensures the consistency of the steel.

The billet is HOT ROLLED to the Y bar profile required, straightened and cut to length

Y Bar lengths are then punched in a single process to ensure holes are aligned, before being "pointed".

All Ag-Post products are coated with either our Black Bituminous coating, or Hot Dip Galvanised.

AGPOST MEGA™

UP TO
80%
HEAVIER
THAN
STANDARD
POSTS

MEGA THICK,
MEGA STRONG,
MEGA LONG LIFE.

Ag-Post Mega is a post option that is easier to transport, store and install compared to timber, concrete and pipe.

With a markedly bigger profile than a Standard Ag-Post, you get mega ground holding capability, and mega strength.

100 x
Timber Posts

100 x AgPost Mega

Hole Spacings aligned with Standard Ag-Post allow easy integration into the fence structure as a mega intermediate post.

*Available in two common coatings;
Black Bituminous and
Hot Dip Galvanised.*

TRUE AUSSIE INGENUITY.

Reliability and speed have become a necessity in today's fencing. Traditional Ag-Post and Ag-Post Mega provide great strength, consistency and value. Ag-Post Lock-IT takes it to the next level, with increased weight & profile combined with the unique Lock-IT system.

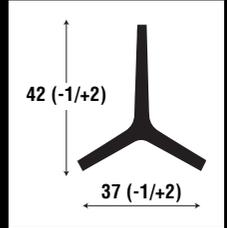

New Ag-Post Lock-IT delivers!

*Tough as the Land Down Under, just **got fast & effective!***

Over 9% Heavier than a standard Ag-Post

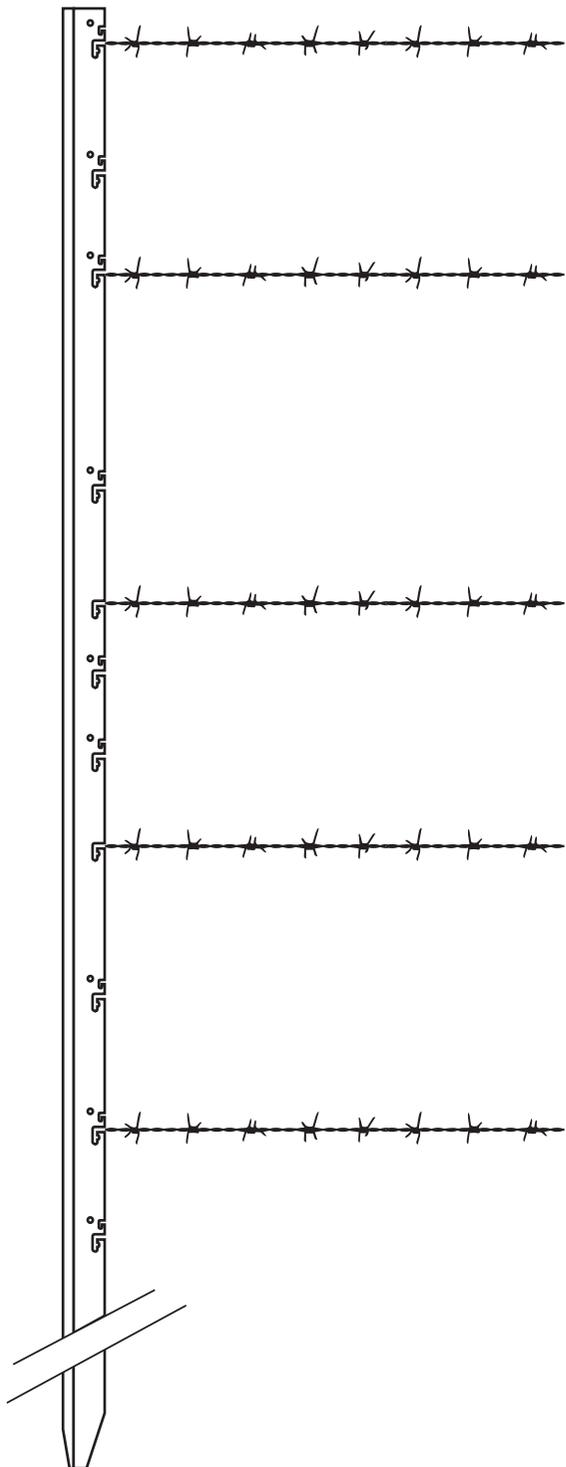

TRUE AUSSIE INGENUITY.

Profile for 165cm and 190cm Posts

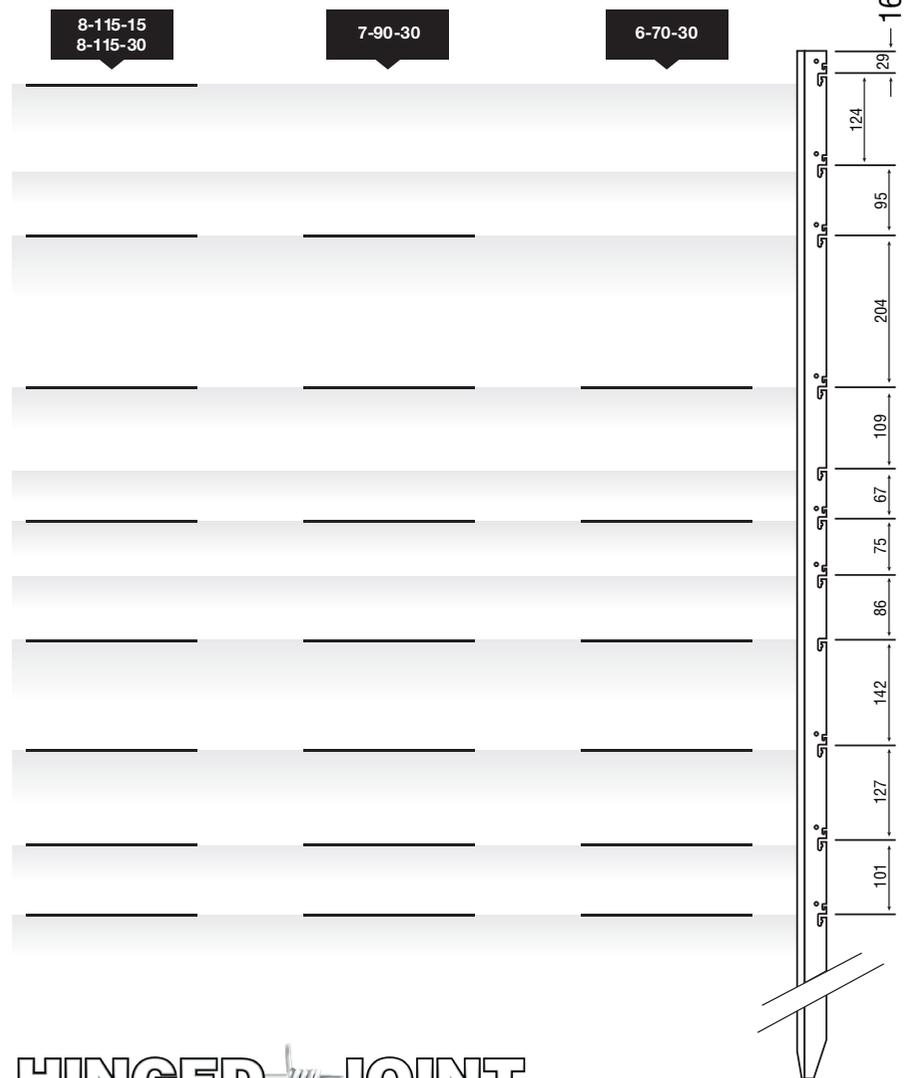

Lock-IT Posts To suit conventional fencing are available in a slightly heavier profile than a standard Ag-Post. This ensures the strength and integrity of the post, accounting for the numerous slots punched into all posts.

The 165cm post comes with a total of 11 slots and 9 clips installed. The 190cm post comes with 9 slots and clips installed in each.

165cm LOCK-IT POST - 9 x Lock-IT Clips, 2 x Slots

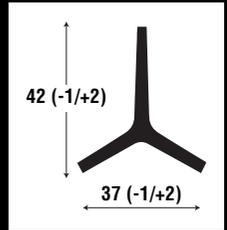

All barbed wire profiles, 1.57mm, 1.80mm, 2.00mm High Tensile and 2.50mm IOWA fit within

Hinged Joint profiles that work with the 165cm Lock-IT Post.

TRUE AUSSIE INGENUITY.

Profile for 210, 225
and 240cm Posts

Lock-IT Posts to suit Exclusion Fencing is manufactured in a profile heavier than the conventional Lock-IT products to meet the increased pressures and forces that these fences will stand up to.

The posts are set in two clip configurations (green to suit 15-150-15) and (pink to suit 16-180-15) to suit the most common line wire spacings.
